Pazitop[®] A.S

Reduces pain & conquers inflammation

Aceclofenac 100 mg + Paracetamol 325 mg + Serratiopeptidase 15 mg tablets

Aceclofenac

- Novel orally administered analgesic and anti-inflammatory agent.
- Comparative therapeutic efficacy as indomethacin and diclofenac.

Better safety compared to conventional NSAIDs

Paracetamol

- Potent and safe antipyretic and analgesic
- Ensures faster and time trusted relief from fever and pain

Serratiopeptidase

- Powerful treatment for pain and inflammation
- Specifically induces fibrinolytic activity, anti-inflammatory activity and anti edemic activity
- Blocks pain inducing amine from inflammatory site

INDICATIONS:

- Post operative pain
- Dysmenorrhea
- Sinusitis and Otitis Media
- Sprains and strains

DOSAGE:

- The maximum recommended dose of Pazitop AS is two tablets daily, taken as one tablet in the morning and one in the evening.
- No dosage adjustment is required for mild to moderate renal impairment
